Trim Size: 8" wide x 10.625" tall

Binding: Saddle Stitch

Line Screen: 100 line preferred on inside pages, 150 line on cover pages

Bleeds: 1/8" on all sides of trim size

Margins: Please allow for a minimum of 3/8" between the trim edge and any important text or graphics.

Film: (We no longer accept film, as our files go directly from computer to plate.)

Electronic File Requirements:

We prefer to receive ad files in PDF format if possible, with all fonts embedded. You can either use Acrobat Distiller (please phone first) or Export directly from your layout software to PDF. PDF-x/1a settings would be fine. The easiest method to send files is by uploading to our FTP site. If the ad is a process-color ad, please make sure there are no spot colors involved.

If you wish to send native files, please be sure to send all fonts and graphics used in the document. The magazine is designed in InDesign CS4 on a Mac, but we can also support InDesign CS4 (or older) for PC, and QuarkXPress 7 or older on the Mac or PC. Use of Microsoft Publisher is possible, but strongly discouraged. We also do not support Pages (Apple software) at this time.

If you wish to set up a basic document in Microsoft Word, we can use that as a base from which to redesign the ad. Be aware that extra design charges may apply, in order to make the file useable in InDesign.
