

STATE OF ILLINOIS

ILLINOIS COMMERCE COMMISSION TRANSPORTATION BUREAU / RAIL SAFETY SECTION

Michael E. Stead

Rail Safety Program Administrator

April 3, 2017

To all Township Supervisors and Highway Commissioners

Dear Madam/Sir:

The Illinois Commerce Commission recently approved the FY 2018-2022 Crossing Safety Improvement Program 5-Year Plan (Plan). The FY 18-22 Plan includes proposed safety improvement projects at highway-rail grade crossings and bridges of local roads and streets located throughout the state over the next 5 years. It is anticipated that over \$196 million in assistance from the Grade Crossing Protection Fund (GCPF), administered by the Commission, will be made available to local highway agencies and railroads for these projects. A copy of the FY 18-22 Plan is enclosed for your information.

If you would like to submit a project for consideration as part of future Crossing Safety Improvement Program (CSIP) Plans, please download a project application from the Commission's website (www.icc.illinois.gov¹), or contact this office for a copy. Separate applications are available for highway-rail grade crossing, highway-rail bridge and pedestrian-rail bridge projects. Please prepare a separate application for each new project you wish to have considered for the Plan. (Note: A new application is not required for any project that was previously submitted but not included in the FY 18-22 Plan or in previous 5-Year Plans, unless the application was submitted longer than 5 years ago.)

If you have any questions, or need additional information, please contact me at (217) 557-1285 or mstead@icc.illinois.gov.

Very truly yours,

A handwritten signature in black ink, appearing to read "Michael E. Stead".

Michael E. Stead
Rail Safety Program Administrator

Enclosure

[¹Note: On the ICC website click on the "Transportation" tab (Top of Page); under "Railroad Safety", select "Crossing Safety Improvement Program"; under "Railroad Safety", select "Forms"; under "Forms", select either "Public Grade Crossing Application", "Public Bridge Project Application", or "Pedestrian Bridge Project Application"]

CROSSING SAFETY IMPROVEMENT PROGRAM

FY 2018-2022 Plan

**PROPOSED GRADE CROSSING PROTECTION FUND
PROJECTS FOR LOCAL ROADS AND STREETS**

ILLINOIS COMMERCE COMMISSION
APRIL 2017

INTRODUCTION

The Illinois Commerce Commission (ICC) has the statutory responsibility to improve safety at public highway-rail crossings in the State of Illinois. Currently, there are 7,651 highway-rail grade crossings in Illinois, of which 765 are on state roads, and 6,886 are on local roads. There are 2,685 highway-rail grade-separated crossings (bridges) in the state. Another 3,649 grade crossings are on private property, which are not under the jurisdiction of the state, and there are also 140 private bridge structures. There are also 320 pedestrian grade crossings and 98 pedestrian grade separated crossings (bridges) in Illinois. Nationally, Illinois is second only to Texas in the total number of highway-rail crossings. Table A summarizes the distribution of highway-rail crossings by type and position.

Table A
Illinois Highway-Rail Crossings

Crossing Type	Crossing Position	Crossings
Public Roadway	At-Grade	7,651
	RR Over	1,742
	RR Under	943
Pedestrian Pathway	At-Grade	320
	RR Over	63
	RR Under	35
Total		10,754

The ICC orders safety improvements at public highway-rail crossings on the local road system, with the cost of such improvements paid by the state, the railroads, and local governments. On state roads, the Illinois Department of Transportation (IDOT) pays the majority of the costs through the State Road Fund. For local roads, the Grade Crossing Protection Fund (GCPF) was created to pay the majority of the costs of improvements.

RAILROAD CROSSING SAFETY — THE THREE E's

Illinois is one of the key transportation hubs in the nation. With approximately 7,400 miles of railroad track, its rail system is the country's second largest, including the nation's largest rail freight hub in Chicago. Illinois has the nation's third largest highway system, with 146,890 miles of highways, streets and roads and 26,724 bridges as of December 2015.

Both the rail and highway systems are among the most heavily used in the nation in terms of volume of traffic, with much of the traffic concentrated in the Chicago metropolitan region. There, the urban mass transit system serves an average of over 623 million passengers a year over an extensive network of bus and rail routes.

Keeping the grade crossing portion of this transportation network operating safely and efficiently involves local, state and federal governments as well as the private sector. These safety efforts can be summarized as the Three E's - **Education, Engineering and Enforcement**.

Education: The ICC is actively involved in developing programs to educate the public about the danger at highway-rail grade crossings. One example of this public education program is the ICC's participation in Operation Lifesaver. The Operation Lifesaver program is a public-private partnership designed to increase public awareness of grade crossing hazards. It also strives to improve driver and pedestrian behavior at railroad crossings by encouraging compliance with traffic laws relating to crossing signs and signals.

Enforcement: Enforcement of existing traffic and trespass laws is key, especially the issuance of fines (up to \$500) or community service to persons crossing railroad tracks after the warning signals have activated.

Engineering: Grade crossing safety improvements are also critical to reducing collisions. The ICC orders physical and system improvements, including the installation and upgrading of grade crossing warning signs and signals and, where warranted, grade separations. While education and enforcement are absolutely essential, the focus of this report is the engineering of capital improvements to further railroad crossing safety on local roads.

2016 IN REVIEW - Collision and Casualty Rates

In 2016, preliminary statistics indicate there were 111 collisions at public crossings in Illinois, compared to 124 in 2015, a decrease of 10.5 percent. National preliminary figures for 2016 indicate 1,712 collisions occurred, compared to 1,781 in 2015, which is a 3.9% decrease.

10 Year Trend in Collisions at Public Crossings: USA (Note: Data Provided by the Federal Railroad Administration)

10 Year Trend in Collisions at Public Crossings: Illinois (Note: Data Provided by the Federal Railroad Administration)

The general public commonly thinks of grade crossing collisions as involving trains colliding with cars, and in a majority of incidents that is the case; however, each year a substantial number of collisions involve motor vehicles driving into the sides of trains. In 2016, 15.3% (17 out of 111) of all collisions involved cars driving into the sides of trains, a percentage which has remained fairly constant over the years. The 17 vehicle-train collisions in 2016 resulted in zero fatalities and 7 injuries.

Total fatalities resulting from collisions at highway-rail crossings in Illinois decreased from 30 in 2015 to 24 in 2016. Fatality statistics, however, are not a particularly good measure of safety. Fatalities are a function of random events, such as how many occupants were riding in a car involved in a collision, or multiple fatalities involved in the same incident (as in the death of eleven passengers involved in the Amtrak/steel truck collision that occurred near Bourbonnais, in 1999). Table B illustrates the distribution of fatalities by collision type in 2016.

Table B
Illinois Highway-Rail Grade Crossing Collisions

Type of Collision	Total Collisions	Fatal Collisions	Total Fatalities
Train Struck Vehicle	76	9	9
Vehicle Struck Train	17	0	0
Pedestrian	18	15	15
Total	111	24	24

RAILROAD CROSSING SAFETY FUNDING

The Grade Crossing Protection Fund (GCPF), appropriated to the Illinois Department of Transportation but administered by the ICC, was created by state law to assist local jurisdictions (counties, townships and municipalities) in paying for safety improvements at highway-railroad crossings on local roads and streets only. Assistance from the GCPF cannot be used for safety improvements at highway-rail crossings located on the state road or highway system. Those improvements are paid for by the Illinois Department of Transportation. Beginning with Fiscal Year 2010, each month \$3.25 million in state motor fuel tax receipts is transferred from the Motor Fuel Tax (MFT) fund to the Grade Crossing Protection Fund. This amount provides the GCPF with \$39 million annually to be used for safety improvements at highway-rail crossings on local roads and streets. The GCPF is typically used to help pay for the following types of projects:

- **Warning Device Upgrades:** Installation of automatic flashing light signals and gates at public grade crossings currently not equipped with automatic warning devices; installation of automatic flashing light signals and gates at public grade crossings currently equipped only with automatic flashing light signals; signal circuitry improvements at public grade crossings currently equipped only with automatic warning devices;
- **Grade Separations - New and Reconstructed:** Construction, reconstruction, or repair of bridges carrying a local road or street over railroad tracks (overpass); construction, reconstruction, or repair of bridges carrying railroad tracks over a local road or street (subway);
- **Grade Separations - Vertical Clearance Improvements:** Lowering the existing highway pavement surface under a railroad bridge to improve vertical clearance for motor vehicles;
- **Pedestrian Grade Separations:** Construction of a bridge to carry pedestrian/bicycle traffic over or under railroad tracks;
- **Interconnects:** Upgrading the circuitry at grade crossings where warning signals are connected to the adjacent traffic signals so that the two systems operate in a synchronized manner;
- **Highway Approaches:** Improvements to the portion of the public roadway directly adjacent to the crossing surface;
- **Connecting Roads:** Construction of a roadway between a closed crossing and an adjacent open, improved crossing;
- **Remote Monitoring Devices:** Sensor devices in the circuitry of grade crossing warning devices which immediately alert the railroad to any failures in warning device operations;
- **Crossing Closures:** Provide an incentive payment to local agencies for the voluntarily closure of public highway-rail grade crossings; and
- **Crossing Surface Renewals:** Up to \$2 million in assistance annually can be allocated for crossing surface improvements.

The cost of railroad crossing safety improvements varies substantially depending on the nature of the work undertaken. A standard installation of gates with automatic flashing light signals on a two-lane road typically costs approximately \$200,000-\$300,000. Additional costs for road improvements could typically range from \$2,000 to \$100,000 depending on the road type and location. Grade separation structures are very costly. The GCPF has made contributions to pavement lowering (vertical clearance improvements) projects costing between \$35,000 - \$4 million, and new underpass structures costing more than \$50 million. Bridges over railroads can cost from \$600,000 for a rural structure to \$40 million for a multi-lane multi-railroad urban structure. Typically, the ICC authorizes contributions from GCPF that pay up to 60% of the cost for grade separation projects and 85% to 95% for grade crossing improvements, although ICC policy is to allocate no more than \$12 million from the GCPF to any individual project unless unusual circumstances warrant otherwise. When the numbers of crossing locations needing improvement are multiplied by project costs, the problem of allocating sufficient assistance from the GCPF becomes apparent.

CROSSING SAFETY IMPROVEMENT PROJECTS

This report presents the railroad crossing safety capital improvements that ICC staff proposes to implement during FY 2018 and also looks ahead to the projects contemplated for FY 2019-FY 2022. In all cases it is assumed that any required local funding match will be available. In some cases local funding may not be available during the same fiscal year in which a crossing improvement has been programmed. In those circumstances the Rail Safety Section staff will recommend to the ICC that assistance from the GCPF for the project be reallocated to another fiscal year to accommodate the local agency.

The ICC receives numerous requests from local communities and railroads for assistance from the Grade Crossing Protection Fund for safety improvements at public highway-rail crossings. During development of each multi-year crossing safety improvement program plan, the large number of potential projects requires the ICC to prioritize projects based upon several criteria, including the relative safety of the existing crossing and the volume and types of existing train and highway traffic. After each potential project is prioritized based on engineering requirements, geographic location is also taken into account so that safety improvements throughout the state can be addressed as equitably as possible. Projects not selected for the Plan are considered again as part of future 5-Year Plans.

The project list for Fiscal Year 2018 (July 1, 2017 through June 30, 2018) includes capital improvement projects that local governments or railroads have previously submitted to the ICC for evaluation and approval, as well as projects based on established priorities. The project list for FY 2019-2022 (out-year list) includes projects based on a continued effort to meet those established priorities:

- **High Collision History** - Each year the ICC places a high priority on upgrading public highway-rail grade crossings which have a pronounced history of train/vehicle collisions, or which have a high predictive value for future collisions. The FY 2018-2022 Plan will address safety improvements at as many of these crossing locations as possible.
- **Rail Corridors** - The ICC has identified as a priority the need to improve public highway-rail grade crossings in rail corridors where conventional speed passenger trains operate.
- **Highway and Pedestrian Grade Separations (Bridges)** - The ICC is continually seeking locations where grade crossing blockages cause substantial motorist or emergency vehicle delay, or where heavy vehicular traffic represents a heightened threat of train/vehicle collisions. This Plan includes funding assistance for numerous highway/rail bridge projects on local roads and streets throughout the state.

The ICC also has authority to utilize the GCPF to assist local communities with the cost of constructing pedestrian grade separations in areas where it is necessary to improve safety. This Plan includes funding assistance for several pedway/rail bridge projects throughout the state.

- **Interconnected Crossings** - The ICC and IDOT are continuing a program to identify and improve highway-rail grade crossings that require the interconnection of crossing warning signals with traffic control signals at adjacent highway intersections.

FY 2018 PLAN

Projects programmed for submittal to the ICC in FY 2018 are listed in Appendix 1. In FY 2018 it is anticipated the ICC will consider projects requiring commitments from the GCPF totaling \$40.3 million, including \$23.2 million for bridge projects.

In FY 2018, the ICC will also set aside \$5 million from the GCPF in contingency funds to address emergency projects which may require rapid resolution; experimental crossing safety projects; low-cost safety improvements at multiple crossings; and incentive payments to local agencies for the voluntary closure of public highway-rail grade crossings. It is anticipated that in the next four years the contingency funds will be used to help pay for low-cost improvements [replacement of incandescent lights with light emitting diode (LED) lights, for example] involving approximately 70 crossings not currently equipped with LED flashing light signals. These projects are summarized in Table C.

TABLE C		
FY 2018 Projects by Project Type		
Total Estimated Assistance from the GCPF		
PROJECT TYPE	CROSSINGS	\$MILLIONS
Bridge Projects	5	23.2
Grade Crossing Improvement Projects	23	10.1
Low-Cost Emergency Projects; Experimental Projects; Voluntary Crossing Closure Incentive Payments; Surface Renewal	200 (Est) ¹	7.0
¹ (Exact number of crossings in this category yet to be determined)		
Total	228 (Est)¹	40.3

NOTE: At the time the FY 2018 portion of the Plan was prepared, it was anticipated that assistance from the GCPF would be available for each project noted in Appendix 1. GCPF assistance may cease for certain projects should the General Assembly fail to appropriate, or otherwise not make available, sufficient funds.

FY 2019 - 2022 PLAN

Projects programmed for submittal to the ICC in FY 2019-2022 are listed in Appendix 2. For those four years, it is anticipated the ICC will consider projects requiring commitments from the GCPF totaling over \$163 million, affecting over 1,000 crossings in over 70 counties. In addition, \$28 million from the GCPF will be set aside in contingency funds during FY 2019-2022. These projects are summarized in Table D.

TABLE D		
FY 2019-22 Projects by Project Type		
Total Estimated Assistance from the GCPF		
<u>PROJECT TYPE</u>	<u>CROSSINGS</u>	<u>\$MILLIONS</u>
Bridge Projects	13	66.3
Grade Crossing Improvement Projects	196	68.8
Low-Cost Emergency Projects; Experimental Projects; Voluntary Crossing Closure Incentive Payments; Surface Renewal	800 (Est) ¹	28.0
¹ (Exact number of crossings in this category yet to be determined)		
Totals	1,009 (Est)¹	163.1

NOTE: At the time the FY 2019-2022 portion of the Plan was prepared, it was anticipated that assistance from the GCPF would be available for each project noted in Appendix 2. GCPF assistance may cease for certain projects should the General Assembly fail to appropriate, or otherwise not make available, sufficient funds.

ACTIVE PROJECTS

The ICC has previously issued Orders that authorize about 100 safety improvement projects, involving almost 140 crossings in over 39 counties throughout the state. These projects are summarized in Table E below. Appendix 3 lists each individual project with specific location and cost information.

TABLE E		
Active Projects by Project Type		
Amount of GCPF Assistance Approved by the ICC		
<u>PROJECT TYPE</u>	<u>CROSSINGS</u>	<u>\$MILLIONS</u>
Bridge Projects	9	38.9
Grade Crossing Improvement Projects	70	23.1
Low-Cost Emergency Projects; Experimental Projects; Voluntary Crossing Closure Incentive Payments; Surface Renewal	60	1.9
Totals	139	63.9

PENDING PROJECTS

The Rail Safety Section anticipates that a number of crossing safety improvement projects will be submitted to the Commission for approval before the end of FY 2017. The projects are summarized in Table F below. Appendix 4 lists these pending projects with location and cost information.

<u>PROJECT TYPE</u>	<u>CROSSINGS</u>	<u>\$MILLIONS</u>
Bridge Projects	5	26.6
Grade Crossing Improvement Projects	64	17.2
