

PO 1305: Overpayments

PR 1305.

When clients get more benefits than they qualify for, there is an overpayment. The error may be the fault of the client or the fault of the GA unit. A benefit amount that cannot be changed because there is not enough time to send a 10-day notice, is still considered an overpayment for the month. No matter what the reason, any time an overpayment is identified, appropriate action must be taken.
